

AVUKI BLESSING ISAAC

Frontend Developer

Mukono, Kampala, Uganda | +256 790 254 276 | avukiblessingisaac@gmail.com | [linkedin.com/in/blessing-avuki-059072374](https://www.linkedin.com/in/blessing-avuki-059072374) | github.com/AvukiBlessing-hub

PROFESSIONAL SUMMARY

Frontend Developer with a strong passion for crafting responsive, accessible, and user-centric web and mobile applications. Proficient in building modern, component-based interfaces using HTML, CSS, JavaScript, and React, with hands-on experience developing cross-platform mobile applications using React Native. Experienced in integrating RESTful APIs and collaborating with backend systems via Node.js, with a solid understanding of full-stack development principles and modern software engineering practices. Seeking an entry-level frontend or mobile development role where strong problem-solving skills, adaptability, and a collaborative mindset can drive impactful user experiences across web and mobile platforms.

TECHNICAL SKILLS

Programming Languages: JavaScript, HTML, C

Frameworks & Libraries: React, React Native

Backend Development: Node.js, Express.js, REST APIs, Authentication & Authorization

Frontend Development: Responsive Design, UI Development, Cross-Browser Compatibility

Databases & Storage: MongoDB, PostgreSQL

Version Control & DevOps: Git, GitHub, Docker, DockerHub

Project Management Tools: Trello, Jira

Development Practices: Agile (Scrum), Clean Architecture, Test-Driven Development (TDD)

Cloud & Deployment: Amazon Web Services (AWS), Vercel

Soft Skills: Communication, Leadership, Critical Thinking, Problem-Solving, Collaboration, Adaptability

PROJECT EXPERIENCE

E-Commerce Platform 2025 – 2026

Technologies: React, React Native, Python, PostgreSQL, Git/GitHub

- Developed a full-stack e-commerce platform with both web and mobile interfaces, enabling users to browse and purchase products seamlessly across devices.
- Built responsive user interfaces using React and implemented mobile-specific features with React Native to deliver a consistent cross-platform experience.
- Architected backend services in Python to manage business logic, user authentication, and transaction processing.
- Designed and maintained a PostgreSQL relational database schema covering products, user accounts, and order management.
- Integrated frontend and backend systems to ensure reliable data flow, clean API contracts, and an optimal user experience.

Grocery Buddy — Shopping List Application 2025

Technologies: JavaScript, Node.js, HTML, CSS, Git/GitHub

- Engineered a full-stack web application enabling users to digitally create, update, and manage shopping lists, eliminating reliance on paper-based alternatives.
- Designed an intuitive, real-time frontend interface for adding, editing, and organizing grocery items with immediate feedback.
- Implemented server-side logic with Node.js to handle data persistence, application state, and business rules.
- Delivered a fully responsive layout to ensure consistent usability across desktop, tablet, and mobile devices.

Mayondo Wood & Furniture Management System 2025

Technologies: JavaScript, HTML, CSS, Git/GitHub

- Built an internal business management system to streamline stock tracking, sales recording, and user account administration for a furniture company.
- Implemented inventory management and sales reporting features that significantly improved operational visibility and efficiency.
- Designed user-facing interfaces for managing product listings, recording transactions, and maintaining business records.
- Reduced manual record-keeping overhead through structured digital data management, improving accuracy and accessibility.

EDUCATION

Apprenticeship in Software Development Nov 2025 — Jun 2026

Refactory Academy — Kampala, Uganda

- Gained advanced hands-on experience in JavaScript, React, and Node.js within a structured, project-based learning environment.
- Developed and deployed scalable full-stack web applications, with a focus on API integration, clean architecture, and modern development workflows.
- Applied Agile (Scrum) methodologies and collaborative engineering practices throughout team-based projects.

Certificate in Software Engineering (JavaScript) Jul 2025 — Oct 2025

Refactory Academy — Kampala, Uganda

- Completed a focused program covering JavaScript, HTML, CSS, web development fundamentals, and version control with Git.
- Received an introduction to backend development concepts and RESTful API design.

Uganda Advanced Certificate of Education (UACE) 2023 — 2024

Blessed Comboni Secondary School

Subjects: Literature, Entrepreneurship, Divinity, General Paper, ICT

LANGUAGES

English (Fluent), Moru (Native), Arabic (Native), Luganda (Beginner)
